

StudyGroup Finder

User Manual

Abdullahi Abdirahman

ASE285 – Individual Project

What this app does

StudyGroup Finder helps students:

- Create study sessions for a course
- Add tags (e.g., BIO101, Exam, Homework)
- Search and filter sessions
- Join/leave sessions and see attendance update

Requirements to run

- Node.js (recommended 18+)
- npm
- Project folder with `app/`

This app runs locally using SQLite.

How to start the app

1. Open Terminal
2. Go into the `app` folder
3. Install dependencies
4. Start the server

Commands:

Commands:

```
cd app
```

```
npm install
```

```
cp .env.example .env
```

```
npm run dev
```

Open in browser:

- <http://localhost:5050>

Create an account

1. Open the site

2. Click Sign Up

3. Enter:

- Name

- Email

- Password (6+ characters)

4. Submit the form

After signup, you are logged in automatically.

Log in / Log out

Log in

1. Click Login
2. Enter your email and password
3. Press Login

Log out

- Click Logout in the navigation bar

Browse sessions (home page)

On Sessions you can:

- See all sessions as cards
- View course, time, location, tags, and capacity
- Click View to open the session detail page

Search and filtering

Use the filter panel:

- Search: find matches in title/course/location/notes
- Day: show sessions for a specific date
- Tag Filter: pick a tag from the dropdown
- Tag Chips: click a tag chip for quick filtering

Tip: clear filters by selecting All and removing the date.

Create a new session

1. Log in
2. Click New Session
3. Fill in required fields:
 - Title
 - Course
 - Start time
 - Location
4. Optional fields:
 - Tags (comma separated)
 - Duration
 - Capacity
 - Notes

5. Click Create session

The session appears in the sessions list.

View session details

On a session detail page you can see:

- Full session information
- Tags
- Attendance count (attendees/capacity)
- Attendee list (names)
- Buttons to Join/Leave (if logged in)

Join a session

1. Open a session
2. Click Join
3. The attendee count updates
4. A toast message confirms the action

If the session is full, you will not be able to join.

Leave a session

1. Open a session
2. Click Leave
3. The attendee count updates
4. A toast message confirms the action

Edit a session (owner only)

Only the session owner can edit.

1. Open your session detail page
2. Click Edit
3. Update fields
4. Click Save

Delete a session (owner only)

Only the session owner can delete.

1. Open your session detail page
2. Click Delete
3. Confirm deletion in the popup modal

The session is removed from the list.

Troubleshooting

Port already in use

If 5050 is busy, change `PORT` in `.env` to 5051 and restart:

Commands:

npm run dev

Reset local data

Delete the SQLite file:

- `app/data/app.sqlite`

Then restart the server (a fresh database will be created).

End of manual

Questions or issues can be verified by checking server logs in Terminal.
